Thus it was possible for the evil Davalpus, aided by the forces of darkness, to seize the throne of Llylgamyn and slay the royal family. Fortunately, the young Princess Margda and her brother Prince Alavik survived the royal coup.

Margda and Alavik both knew that there was but one hope of defeating Davalpus. Together they retrieved the fabled armor of the great hero, "*The Knight of Diamonds*". Alavik, wearing the mystical garb, and carrying the staff, engaged Davalpus in an epic battle in the castle of Llylgamyn. Davalpus fell, but with his dying breath uttered a curse so unspeakable that it brought the castle down around the two combatants. All that was left was a smoking hole in the ground. Davalpus, Alavik and the staff were gone. If it is not returned, the city will fall!

**SIR-TECH**

Dear Wizardry Purchaser:

Thank you for acquiring the most widely acclaimed game program for the micro-computer. It's popularity is attested to by Wizardry's long term standing as the number one program of its class. Among the reasons for Wizardry's great standing is its exceptional long term playing value.

It has come to our attention that some software vendors are marketing so-called "cheat programs". These products allow you to create characters of arbitrary strength and ability.

While it may seem appealing to use these products, we urge you not to succumb to the temptation. It took more than four years of careful adjustment to properly balance Wizardry. These products tend to interfere with this subtle balance and may substantially reduce your playing pleasure. It would be akin to playing chess with additional queens, or poker with all cards wild.

It has also come to our attention that some of these programs are unreliable and may even destroy the data. While we repair or replace inoperative disks free within 30 days of purchase, or for a nominal fee of \$5.00 anytime thereafter, we will not do so for disks damaged by a cheat program.

With kind regards and our best wishes for many, many hours of fun and pleasure.

Yours truly,  
*Andrew Greenberg & Robert Woodhead*

**Tips on Keeping Your Computer Healthy**

We hope you are getting a byte or two out of your computer each day. Here are a few tips on prolonging the life of your software.

**Clean Your Disk Drives**  
 Cleaning your disk drives takes only a few minutes and makes them work better. Clean your drives every second week.

**Get Your Drives Tuned**  
 A majority of disk problems are caused by misaligned disk drives. Your most valued software could be damaged. So protect your investment—get your drives aligned and speed adjusted at least twice a year at your dealer.

**Protect Your Computer's Power**  
 Computers like a steady power supply. However, large appliances or equipment send spikes down a power line. These power spikes cause memory glitches and can alter software if you were writing to the disk when a transient happened. A surge suppressor such as a Blitz Bug will prevent power surges. At \$25 to \$50, they are a good investment.

Follow these tips and you will probably never have a problem with your software. Our experience has been that at least 97% of reported software problems are caused by unmaintained computers. Your dealer is in business to support you. If you have any questions, go see him, he will be happy to help you.
